

IdentiTill – Cashless Catering

General description of the capabilities and functionality

IdentiTill takes the hassle out of the administration and reconciliation of fixed charge school meals. IdentiTills biometric technology provides finger identification with photograph authentication at the point of sale or delivery.

Catering for free and paid school meals, pupil accounts are automatically updated on a daily basis by the catering POS operator.

IdentiTrip can be used in conjunction with existing Point of Sale equipment to implement a cost effective cashless catering solution.

Notable Features

“Designed for schools and with the assistance of schools, IdentiTill provides a simple alternative for cashless catering and will make your Job so much easier”
